DS-CHANGES Workshop:

Climate Challenges and the Agricultural Transition

University of Brescia, Italy | **26–27 January 2027**

We are pleased to announce a two-day workshop on *Climate Challenges and the Agricultural Transition*, jointly organised by the **University of Brescia**, **Sant'Anna School of Advanced Studies, Pisa**, and **Fondazione Eni Enrico Mattei, Milan**.

The workshop marks the conclusion of *DS-CHANGES (Data Science for Carbon Harvesting and the Agricultural Transition)*, a project funded by **Fondazione Cariplo** (Grant No. 2023-3256).

Agriculture is at the heart of the carbon challenge: it must adapt to climate change while contributing to its mitigation. The transition towards smart agriculture and carbon farming offers opportunities to reconcile these goals, with implications for farmers and land-use dynamics. Policies and incentive mechanisms play a central role in supporting this transition and shaping the economic and environmental outcomes. ***The workshop aims to foster discussion on how agriculture can contribute to climate solutions and how policy can support a sustainable and resilient agricultural sector.***

We welcome theoretical and empirical contributions on topics including, but not limited to:

- Carbon farming and carbon removals in agricultural systems;
- Land-use changes and agricultural transition;
- Agricultural policies and their implications;
- Climate challenges in agriculture, including adaptation and mitigation;
- Climate-smart technologies and their adoption in agriculture.

Workshop format

A limited number of papers will be selected for presentation, with a discussant assigned to each paper. Selected participants will be invited to give a 20-minute presentation in person, followed by 10 minutes of discussion. Presenters will also be asked to serve as discussants for another paper.

There is **no registration fee** and **accommodation costs will be covered for selected presenters**.

The programme will feature a keynote lecture by **Professor Alessandro Olper (University of Milan)** and a roundtable bringing together stakeholders, practitioners and academic researchers.

Submission guidelines

Authors are invited to submit an extended abstract of **no more than 1,500 words**. Submissions should include the paper title, author names and affiliations, the corresponding author's contact details, and at least three keywords.

The extended abstract should outline the research question, methodology and main findings or preliminary results.

Please submit your contribution by **15 November 2026** via the [submission form](#) or by scanning the **QR code** below

Authors will be notified of the outcome of the selection process in *early December 2026*.

For any questions, please contact: dschanges.workshop@gmail.com

Scientific committee

Davide Bazzana (University of Brescia and Fondazione Eni Enrico Mattei, FEEM),

Cecilia Castaldo (Sant'Anna School of Advanced Studies, Pisa),

Matteo Coronese (Sant'Anna School of Advanced Studies, Pisa),

Cristina El Khoury (University of Geneva and Fondazione Eni Enrico Mattei, FEEM),

Elisa Grugni (University of Brescia),

Mattia Guerini (University of Brescia and Fondazione Eni Enrico Mattei, FEEM),

Francesco Lamperti (Sant'Anna School of Advanced Studies, Pisa and RFF-CMCC European Institute on Economics and the Environment, EIEE).
